

Case Study: Seamless Flooring Systems

Deli Co, Milton Keynes

Client: Deli Co, Milton Keynes

Contractor: Lodge Park Construction

Commenced: January 2014

Completed: March 2014

Area Coverage: 2,400m²

Project Description

Deli Co is a food processing company operating from a 2,400 Sq m new build premises at Milton Keynes, with a predominantly wet working environment. This called for a flooring system capable of performing in these conditions, with excellent wet anti-slip values and able to withstand hard wheeled traffic, abrasion and high levels of impact.

A highly durable, abrasion and impact-resistant, self-priming and self-sealing resin floor, supplied and fitted by Zenith, met the requirements of Deli Co perfectly. First, the new concrete slab floor was PPC shotblasted to provide a good mechanical to which the finish could bond. Then Resdev Pumadur HF was laid at 6mm by a team of 4 people, and all expansion joints were reinstated by saw-cutting, and backfilled using Pumexpand P.

The main difficulty encountered was the cold ambient temperature for the majority of the project.

Products & Systems Used

Resdev Pumadur HF

Pumexpand P
