

## Case Study: Seamless Flooring Systems

# Floor Treatment for New Packing Area

Client: Local Health Products Producer

Project: Floor Treatment for New Packing Area

Product Value: £7,500

Products: KDR EPO Primer + EPO Flow SL 2/3mm

Commenced: May 2024

Works Duration: 3 Days

Area Coverage: 91 square metres

### Project Description

With over thirty years of experience in health food supplements, this local producer knew exactly what they needed for their new packaging area within their state-of-the-art production facility in Coventry. Zenith Contract Services' resin flooring division was tasked with supplying and installing a self-smoothing, easily cleanable epoxy resin system.

### Product Selection

The client required a durable, hygienic, and aesthetically pleasing floor. The chosen product was KDR EPO Flow in a striking mid-blue (RAL Code 5015), known for its durability and ease of maintenance.

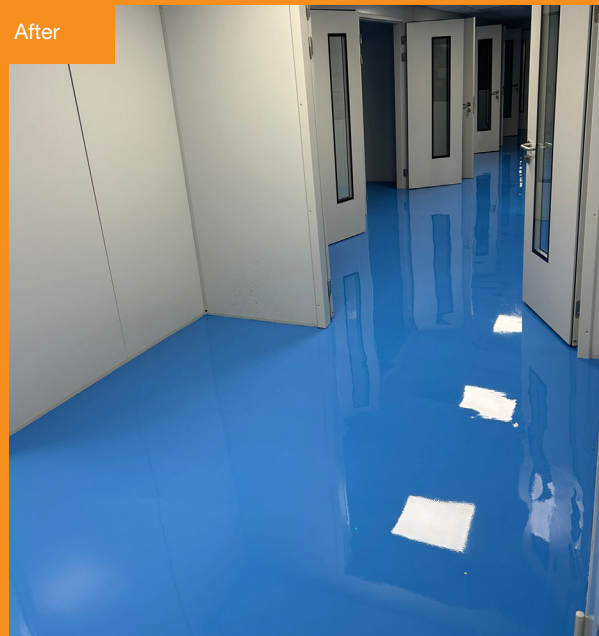

### Surface Preparation

Our team began by thoroughly preparing the existing surface. Using a diamond-headed grinder under strong vacuum, we ensured minimal dust contamination, which is crucial for a clean and effective application of the new floor system.

During Prep

After

Further details can be found on the following page.

### Primer Application

Two coats of KDR EPO primer were applied using rollers and brushes to ensure thorough coverage and optimal adhesion. These coats were allowed to cure fully before proceeding to the final layer.

### Final Floor Application

The final layer involved applying the EPO Flow self-smoothing system. This was done using trowels and spike rollers to achieve a seamless, smooth finish that met the client's exacting standards.

### Outcome

The project was completed within the allocated three-day period and met all client specifications. The result was a high-quality, visually appealing, and easily maintainable floor that enhances the new packaging area's functionality and appearance.

The client was very impressed with the final application and the professional manner in which the Zenith team approached and executed the work. The project was completed on time with minimal disruption, reinforcing Zenith Contract Services' reputation for excellence.
