

Case Study: Refurbishment Services

Deep Clean for Canteen Area at Warehousing Facility

Client: Long-standing Warehousing Client

Works Duration: Half-day

Area Coverage: 95 Square Metres

Project Description

Our existing client, a leading warehousing company, reached out to our Contract Cleaning team with an urgent request for an additional service. The canteen area, covering approximately 95 square metres, required a deep clean to the floor to address ingrained dirt that regular mopping had failed to remove.

Challenge

The main challenge was the build-up of stubborn dirt embedded in the vinyl flooring. Traditional day-to-day cleaning methods such as mopping had proven ineffective in maintaining the cleanliness and hygiene standards required in a high-traffic canteen area.

Solution

Zenith Contract Cleaning responded promptly, completing the project within 48 hours of the client's request. Our team utilised a pedestrian scrubber drier, an effective tool for deep cleaning large floor areas. This machine allowed us to efficiently lift and remove the ingrained dirt, restoring the vinyl floor to a pristine condition.

Further details can be found on the following page.

Outcome

The deep clean was completed in just half a day, significantly improving the cleanliness and appearance of the canteen area. The client was highly satisfied with the quick turnaround and the thoroughness of the cleaning, reinforcing their trust in Zenith Contract Cleaning for maintaining their facility to the highest standards.
