

## Case Study: Seamless Flooring Systems

# Bikers World, Birmingham

Client: Bikers World

Commenced: April 2007

Completed: 10 days

Area Coverage: 600m<sup>2</sup>

### Project Description

Bikers World is a large store in Birmingham providing everything for the motorcycle enthusiast.

As part of a refurbishment project Zenith Contract Services Limited provided 600 sqm of flooring for the showroom.

There was an old, rough, weak concrete floor which needed to be planed, a DPM applied followed by an epoxy screed and then the final finishes.

For this project a range of products from Resin Surfaces Ltd were chosen including Polymer underlay, Resuscreed 43, Resuseal WB and Resupen WB Matt.

The resin finish has provided a hard-wearing, matt finish with good abrasion and impact resistance - that can take the traffic from the motorcycle tyres. The floor has given a seamless look in a striking design using black and red to enhance the new showroom and display the bikes to good effect.

Further images are featured on the following page.

### Products & Systems Used

Polymer underlay, Resuscreed 43, Resuseal WB, Resupen WB Matt
